Founder Member of the “Gruppo Italiano Socket Shield”

Certified Invisalign GO

National and International Lecturer in Implant Dentistry

Implantology, Oral Surgery and Phrosthodontics is what I daily do since 2001, after couple of years of general dentistry with passion, at that time, for endodontics and composite restorations.

During the last years I've started to use Dicom files to analyze Tc Dental Scans for surgery's and implant planning. Since last year I've become very good using Cone Bean technology (Gendex and Soredex), InVivo and 3D OnDemand software for planning every implant case, using guided surgery. Lately I'm using everyday dental microscope and intraoral scanners with Exocad software to produce directly our prosthetics from Arctica by Kavo and an other five axis milling machine.

Expert in osseodensification procedures using Magnetic Mallet and Soniflex for sinus lifts surgeries and split augmentation surgeries.

First Language **Italian**
